

Passenger Lift Services Ltd

GNX

Totally automatic 2 piece lift

for fitment to front stepwell, mid
stepwell, locker **OR** rear mounted.

Innovation keeps PLS ahead!

Passenger Lift Services, the countries leading under floor welfare lift manufacturer, has recently launched an upgraded version of the front entrance coach lift which has been popular with National Express, Stagecoach and many other high profile coach manufacturers.

In Europe a program of continued development has been in place throughout the production history and a new 'light weight' version has just been launched. Coach builders and operators are under constant pressure to produce higher specified coaches without increasing overall axle weights, PLS has helped here by saving over 100Kgs of mass from the flagship NX product.

- Box height significantly reduced from 220mm to 165mm
- Weight saving - 100kgs+
- Height lifting capacity 350kgs
- Narrower cassette size
- Longer bridging plate options
- Massive platform size of 1700mm x 820mm

PLEASE CONTACT US IF YOU HAVE ANY SPECIAL
LIFT REQUIREMENTS - Bespoke lift solutions can be
built to suit most vehicle types.

GNX - with or without Magic Floor option

GNX

Offers higher/lower floor range ability

On Site Fitting

- S.W.L. Test Certificate Issued
- C.E. Certificate Issued
- LOLER Installation Compliance Certificate issued
- Fully PSVAR, DDA, COIF, SVTA, BS6109 and Directive 2001/85/EC compliant, please confirm when ordering.
- New user friendly handset

The new lift is now known as **'GNX'** which still utilizes the Magic Floor system. The Magic Floor system is significantly lighter too.

Although this lift enables greater weight savings there are still some advantages to utilizing the Magic Floor system, namely: A larger floor space for turning wheelchairs and a shorter less obtrusive bridging plate, the Magic Floor is also far more stable than long bridging plate solutions.

The height of the cassette has been reduced from 220mm to 165mm, a significant saving. Other advantages of the newly upgraded product include a higher lifting capacity at 350Kgs and a narrower cassette width making it easier to install into the vehicle. These design changes have been made without compromising the build quality or reliability of the original product.
