

mega lift

coach access lift solutions

The PLS Mega 'Coach' Lift is the UK's leading coach access solution. The basic design can be easily modified to provide bespoke products to solve your accessibility requirements.

- Maximum loading height 2.3 metres
- Platform length available 1.4 to 2 metres
- Platform width available - 725mm to 925mm
- Fits unobtrusively into top or bottom of luggage area.

A range of executive and touring coach lifts with ground to coach deck heights of up to 2300mm.

Mega Lift provides access for the mobility impaired to long distance touring coaches opening the possibility of more extensive travel than was previously available.

Generally mounted within the upper area of the luggage compartment an installation which enables retrospective fitting ensuring protection from the corrosive effects of road dirt, salt and spray.

The lift is fully PSVAR, DDA and Directive 2001/85/EC compliant!

Wheelchair access to executive & luxury coaches

Mega coach lift

We also manufacture the NX lift which is a fully automatic version of the Mega lift. The one piece platform size of 1200mm long and 800mm wide meets all current legislations applicable. Both the Mega and NX lifts can be mounted in step-well or luggage area applications.

Advantages:

- Cost effective lift price
- Simple / reliable operation
- No chassis modifications required
- Can be fitted at your premises in minimum time

Retro-fit

Both of our coach lifts can be retro-fitted to existing vehicles. The Mega lift would usually be installed in a side locker and an extra door is added for wheelchair access. Where possible the lift is designed to be positioned in either the top or the bottom of the locker to maximise available luggage space.

The retro-fitting of the NX lift will be significantly simpler due to the vehicle being originally designed to facilitate the installation. New coaches can be manufactured to include all required lift and ancillary brackets, so that no welding is required. Special panels will then be positioned over the step and floor sections which can easily be removed to allow lift installation.
